Jewelry Tip #6

Peridot – Peridot is the gemstone used to represent an August birthday or anniversary. When wearing peridot jewelry, you should protect the gemstone from any activities that could potentially harm the stone, like house cleaning or gardening. Always put on your jewelry after applying makeup, perfumes, lotions, hairsprays, etc. which can damage your peridot jewelry. Also, keep peridot jewelry out of direct sunlight for extended periods of time because fading may occur. Extreme temperatures can also cause cracks or other damage to your peridots.

Remember that cleaning and inspecting of your jewelry on a regular basis is important to maintain your special jewelry and prevent lost or chipped stones, loose stones, and much more. Stop in today to have your jewelry cleaned and inspected for FREE!

We Do Jewelry Repairs & Restoration

Need to have a ring sized? Chain repaired? Prong work? In addition, we provide watch battery installation, diamond and gemstone replacements, tighten prongs, replace clasps, and transform unworn pieces into wearable treasures every day of the year! Any services you need are all completed in house in a timely manner. Need your repair done fast? We can do that too. For a complete list of services check out our website or stop in today!
