Jewelry Tip #4

Sterling Silver – Sterling silver is a very popular and valuable jewelry to have. Cleaning and maintaining your sterling silver jewelry is simple. For best results, wear your sterling silver jewelry often. By wearing your jewelry, you slow the oxidation process, which causes tarnishing. Over time, tarnishing may occur, and a simple cleaning cloth takes care of most tarnish. Some liquid cleaners are also available, but recommended for use only by a trained jeweler.

Remember that cleaning and inspecting of your jewelry on a regular basis is important to maintain your special jewelry and prevent lost or chipped stones, loose stones, and much more. Stop in today to have your jewelry cleaned and inspected for FREE!
